Key benefits

Reclaim valuable time

Swift information retrieval

Write more professionally

Enhance decision making

Personalized Intelligence

AI for Phone

Background Noise Reduction

AI actively filters out background noises like barking dogs, passing cars, and chatter, ensuring clearer audio and fewer distractions for all participants.

Closed Captions / Live Transcriptions

Enhance inclusivity in live video meetings with real-time speech-to-text conversion, enabling easy comprehension and review with full call transcripts in English, Spanish, German, and more.

Real-Time Note Taking

Simplify phone calls with real-time AI smart notes, capturing crucial updates, actions, and questions. Post-call, easily edit and share notes through email or chat, all synced with your call history for effortless retrieval.

AI for Messaging

AI Writer & Translator for Texts and Messaging

Craft articulate and contextually aware texts and messages with a few simple commands. Edit and polish up messages or create messages from scratch with prompts. Also provides the ability to accurately translate messages in Chinese, French, English, Spanish, and German.

AI Message Summaries

Quickly get up to speed with one-click message summaries that condense lengthy team chats into key highlights, saving you time from scrolling through every missed message. Perfect for busy teams, this feature ensures you stay informed without the hassle of reading through endless threads.

AI for Video

Meeting Insights & Summaries

AI-driven summaries of your recordings frees up time from tedious note-taking and rewatching recordings. Dive into discussions with full focus, knowing that every key point and decision will be captured and neatly summarized for you. This innovation not only saves valuable time but also enhances team collaboration by making it easy to share and review meeting recordings and highlights.
